

Field-crossbow EuroMasters 70m-60m-50m and Finals Ennigerloh - May 29-31, 2009

SW. Last weekend's field crossbow competition in Ennigerloh was - as every year - a great success for the competitors as well as for the organizers writes Steffen Wolfering.

The Visier 59 Ennigerloh e.V. Shooting Club has organized this competition for more than 15 years now and in its 50th anniversary year the competition was held on new distances - 70m-60m-50m - which had a very good reception from the shooters. The competitors especially pointed out that the 60cm FITA face, used on every distance, was more comfortable to shoot at. For us crossbow shooters it is very important to reactivate former competitors - as well as to get more new shooters involved. In Germany, at least, the numbers of shooters is at its lowest point since the introduction of field crossbow in 1987. The results of the competition in Ennigerloh (which you can download from this page) were almost at the same level as those from the "normal" IAU IR900 competitions held in the past, so that we expect the same level of results as on the "old" distances in the near future. Before this competition only a few of the competitors had ever shot on 70m. Also new shooters, who had never seen a field crossbow before this event, had few problems with such a long distance. Only one shooter needed to change his crossbow set-up because the bolt would otherwise have struck the front sight. Everyone else had no problem with adjusting their sights for the 70m distance. The Finals were held as a "shoot-off" which every shooter was allowed to start in. The format was as follows; first, every competitor shot one bolt after which each shooter with 5 points or less must leave the competition. The remaining competitors then shoot again and those with 6 points or less are eliminated. This shoot-off was held on 70m directly after the end of the main competition. In Ennigerloh only 6 shots were necessary to declare **the winner** - which was **Mr. Peter Wohlgensinger, the President of the Swiss Field-crossbow Federation**. This competition was held as a "test" for future events in order to re-activate competitors from those countries who are no longer attracted to the 40cm 3-spot target face or the 35m distance. Unfortunately the competition in Zirndorf, which took place one week earlier, prevented some countries joining our event. But it was more important to support the first international field-crossbow contest in Bavaria than to test new distances - so we can understand all teams and support their decision! As we heard from Zirndorf's head organizer Josef Beckmann, this competition was also a great success.

We hope that the IAU's Field TC will discuss this new development which, we believe, will be able to re-activate shooters from those nations that have not been seen on international events for years now - and perhaps to motivate new shooters from more nations to join our great sport.
